Covers AMs 2, 56, 57

Recital 6 a (new)

Text proposed by the Commission

Amendment

(6 a) To prevent the misuse of firearms, it is necessary to include minimum requirements for safe storage of firearms in this Directive. Member States should ensure that any person that lawfully acquires or possesses a firearm or ammunition is required to take reasonable

COMPROMISE AMENDMENT 3

Covers AMs 69, 70, 71

Recital 9

Text proposed by the Commission

(9) Some semi-automatic firearms can be **easily** converted to automatic firearms, thus posing a threat to security. Even in the absence of conversion to category "A", certain semi-automatic firearms may be very dangerous when their capacity regarding the number of rounds is high. **Such semi-automatic** weapons should therefore be banned for civilian use.

Amendment

(9) **Harmonisation of European technical specifications and standards is desirable.** Even in the absence of conversion to category "A", certain semi-automatic firearms may be very dangerous when their capacity regarding the number of rounds is high. **High capacity magazines** (of more than 10 rounds) should therefore be **restricted** for civilian use. **The classification of weapons in category "A" should be carried out on the basis of technical and implementable criteria.**

There is a risk that any converted firearms can be converted back into firing live ammunitions. Therefore all converted firearms should remain in the categories in which they were originally built.

It is therefore appropriate to limit** the selling of arms and components by means of distance communication,

Amendment

(12) Selling arrangements of firearms and their **essential** components by means of distance communication may pose **particular threats** to security as they are more difficult to control than the conventional selling methods. **To ensure adequate controls** it is therefore appropriate to limit the selling of arms and components by means of distance communication, notably internet, to dealers
